

FX Connect[®]

Streamline your operations

Manage multiple portfolios, connect with counterparties and streamline global trading operations with FX Connect, our award-winning execution venue.

FX Connect is part of our GlobalLINK™ suite of e-trading platforms, technology and workflow solutions that help you simplify and automate the entire FX trading process. It covers everything from pre-trade due diligence and execution to post-trade settlement. Designed to meet the needs of asset managers, hedge funds and other institutional investors, FX Connect supports your ability to navigate the complexities of the trading process and achieve best execution.

Since its launch as the first multibank trading platform, FX Connect has become an essential trading and workflow solution for more than 500 asset managers and hedge funds. It offers significant size and scale, deep liquidity, access to more than 300 currency pairs for spot and up to 70 pairs for forward and swap.

Key features:

End-to-end FX trade management compatible with all major order management systems

Access to a deep and broad liquidity pool comprising more than 65 sell-side providers

Integrated with TradeNeXus[®] to create operational efficiencies, reduced risk and cost savings

Key benefits:

Today, it is a global platform with users in more than 30 cities around the world and more than 325 SWIFT custodial designations.

When you choose FX Connect as your execution venue, you gain access to a deep and broad liquidity pool featuring a choice of more than 65 liquidity providers. You also benefit from a wide and flexible range of execution styles to meet some of the most sophisticated trading requirements.

As part of a global systemically important bank* and as one of the largest financial institutions in the world, we are uniquely positioned to provide our clients with a full-time, international client support network that comprises dedicated personnel delivering 24-hour service. Our local team of experts provides support for your liquidity, trading or platform needs along with regional language support in some areas.

Cross currency netting functionality

FX Connect's cross-currency netting functionality is one of the most effective execution methods for many asset managers. It facilitates efficient and cost-effective portfolio trading of up to 5,000 allocations through its ability to provide portfolio pricing on a netted basis.

Automated order router

Buy-side users can further streamline their execution process by using FX Connect's Automated Order Router to implement rules-based trading for Request for Stream sessions. Users can establish a fully customizable rule set to determine the submission and acceptance of orders. Automated orders can be monitored in real time and users can take manual action to accept or cancel as needed.

AutoPilot

Users can automatically create and submit sessions based on flexible, customizable rules. When paired with FX Connect's existing auto-acceptance rules, allocations can seamlessly be imported from an OMS, submitted, executed and returned to the OMS filled, with no manual intervention or action required.

Multiple execution styles

As an FX Connect user, you benefit from comprehensive execution capabilities that allow you to transact spot, forward and swap trades across multiple counterparties. The system supports numerous trading styles and strategies to meet nearly every requirement.

Automated workflow management

One of the main benefits of FX Connect is full electronic integration of your workflow, which includes pre-trade upload, trade execution and post-trade matching and confirmation with our TradeNeXus platform.

TradeNeXus forms an integral part of this process, allowing trades to be enriched with settlement instructions and appropriate trade notifications sent via SWIFT. With its ability to integrate with multiple client-side systems, TradeNeXus provides a standardized post-trade workflow for all FX activities.

New web-based interface

Our new LINK platform is designed to transform the user experience by streamlining workflows with powerful, interoperable, complementary product integrations.
